

PROPOSAL FOR ELECTIVE DIDACTIC ACTIVITIES (ADE) A.A. 2020-2021

TITLE ADE	Facial aging: from pathophysiology to surgical and medical treatment				
PROF./ DR.	Raffaele Rauso				
SSD	MED29				
GENERAL AND SPECIFIC OBJECTIVES (MAX 500 CHARACTERS)	In the last 20 years, several scientific publications demonstrated the facial aging process, it is characterized by both a progressive reabsorption of facial skeletal tissues and a facial fat pad atrophy. At the same time, surgical and medical procedures, designed to restore the proper features of the face and fighting the process of face aging, have been developed thanks to the introduction of several medical device designed to this purpose. The aim of this ADE is to provide the correct pathophysiological steps of face aging, as well as an adequate classification of both medical and surgical antiaging treatment.				
ACTIVITY TYPE	PROPOSED ACTIVITY	MINIMUM DURATION (HOUR)	ADE DURATION (HOUR)	CFU	PROPOSED CFU
