

CLASSROOMS FOR FRONTAL LESSONS.

The classrooms dedicated to lectures were provided by the School of Medicine.

The structures of the University, although of very old construction, are adequate as regards the video projection.

All are equipped with emergency exits. In each classroom there are equipment for opening / closing lesson with pass badges for teachers and students.

Each teacher, after passing his personal badge, enters his own codes and follows the pass of badges by students. At any time the teacher is able to check how many students have passed the badge indicating their presence e check if they are present in the classroom.

Sometimes the sessions for students in some classrooms are not adequate, except in others, such as the SP1, the Bottazzi and the Donatelli, re-modernized more recently.
